

Washington County Bird Scramble & Match

Washington County is a bird haven. These are some of the birds that can be found in the area. Unscramble the bird names and match it to the bird and then watch for them in our neck of the woods.

There are over 50 different varieties of me in the world!

View one of my authentic nests at Jackson Bottom Wetlands. It is 8 ft tall by 6 ft wide.

A group of me on the ground is a 'gaggle'. A group of me in the air is called a 'skein'.

My favorite foods are rabbits, fish, frogs and other aquatic species

See up to 10,000 of me flying in and out of a school chimney!
